Southern States Evergreen Lawn Grass Seed For the convenience of those of our customers who object to the Bermuda Grass, we have decided to offer them this year **Southern States Evergreen Lawn Grass Mixture**. A mixture of the best grasses that exist for general planting in the Southern States. Most lawn grass mixtures are of little use in the South, as they burn out in dry summers.

Vestal's Evergreen Lawn Grass Seed is a well balanced scientific blending of the best American grasses which will flourish under varied and adverse conditions of soil and are by nature adapted to hot, dry climates. It quickly produces a firm, deep velvety and elastic turf and holds its beautiful emerald green color throughout the season.

By using Vestal's Evergreen Lawn Grass Seed and with some care and attention to watering, an all-the-year-round lawn can be maintained in the Southern States where lawns generally do not thrive. For a plat 15x20 feet, or 300 square feet, use one quart. Price, delivered free, 45 cents per quart; \$1.25 for 3 quarts; \$2.00 for 6 quarts.

CALIFORNIA PRIVET

The Great Hedging Plant

AMOR RIVER PRIVET

Price, first size plants, 2 to 3 feet, \$10.00 per 100; second size plants, 18 to 24 inches in height, 15 cents each; \$1.00 per dozen; \$8.00 per 100.

Dear Sirs:

I must tell you of our real success in using Southern States Evergreen Grass. Little over a year ago we built a home in a new part of Cairo. Our conditions make grass hard to grow, but after planting Southern States Evergreen Lawn Grass seed we have summered and wintered it and it's just dandy.

MRS. H. S.
CANDEE,
Cairo, Ill.

We can furnish a fence to grow like this California Privet Hedge at 8c a "running foot." It can be trimmed at any time without injury.

Information for Purchasers

WHEN YOU ORDER, please use the printed envelope and order sheet enclosed. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and State on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

LOST OR UNSIGNED ORDERS. Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent, and sign the name and address the same as in the first order, so that it may have immediate attention.

HOW TO SEND MONEY. Our terms are cash. To avoid delay please send money with order. Money may be sent at our risk if forwarded by P. O. Money Order, Express Money Order, Bank Draft or in Registered Letter, and cost of same may be deducted from amount forwarded; but we cannot be responsible for any order or money that fails to reach us when not sent as above directed. CASH should be sent by Registered Letter, but coins should be carefully wrapped and care taken to seal letter securely. New postage stamps accepted for small amounts.

AGENTS. We employ no agents and are only responsible for orders sent direct to us.

ERRORS. As an evidence of our human failings we sometimes make mistakes. Careful as we are to protect ourselves and our patrons, preach as much as we will to our employees, yet they occur; when they do, notify us at once; we will correct them promptly.

SHOULD YOU RECEIVE two or more Catalogues alike, which sometimes occurs, have the kindness to present such as you do not need to others who will likely want plants. By doing so confer a double favor. We will also feel thankful for your recommendations of our establishment to your friends wanting plants. A copy of our Catalogue will be furnished to friends requiring plants on receipt of their address.

WHEN SENDING CLUB ORDERS please give full name and address of each member of the club, so that we may enter their names on our books and forward them our Catalogues as issued.

BETTER THAN WE PROMISE. We always do better than we promise in the way of extra plants, so when the order will at all afford it we add to it some plant or plants

gratis, often choice new kinds; several of the Roses now so eagerly sought after were first introduced to our customers in this way—presented with their order.

ORDERS BY EXPRESS. Two-year-old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller size plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is, of course, much better for our customers. **Express charges must be paid by the purchaser**, unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now twenty per cent less than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

OUR GUARANTEE. We guarantee all our plants to reach their destination in a good growing condition, but when we have done this our responsibility ceases, because we know that if they receive proper treatment they will grow nicely. Many plants die from careless treatment and neglect; in such cases we can not and should not be expected to replace them.

Do not be confused with senseless guarantees which mean nothing. The best guarantee is that given by a reputable house to deliver all goods in first-class growing condition, and failing therein, to replace them immediately. Furthermore, we guarantee that when goods are received, if they are not thoroughly satisfactory, we will make them so or **refund your money**. When plants reach you in good condition and are planted with ordinary care there is no difficulty in guaranteeing them to bloom at the time nature intended they should, which is sometimes termed "a seasonable time." It would be quite as sensible if we were to guarantee that they should bloom at any other time but at the time nature intended that they should, the so-called seasonable time. We are sure that a guarantee that states that plants are guaranteed to bloom under the above conditions, **provided they are not winter killed or die from any other cause**, will be taken for what it is worth. Vestal's plants are guaranteed to reach you in first-class condition, and if you give them any kind of care, we guarantee them to grow and bloom.

The firm VESTAL & SON has no connection whatever with any other concern in Little Rock or elsewhere, but is the old original firm established on this present site by its founder, JOSEPH W. VESTAL, in 1880. Letters addressed to VESTAL, LITTLE ROCK, ARKANSAS, will reach us.

VESTAL ROSES AND HOW TO GROW THEM

Who Should Plant Roses. The Joy of Accomplishment

Everyone should plant roses. There is no home, worthy of the name, where space could not be found for from ten to one hundred rose bushes. If a renter, plant roses; you will get returns in beautiful flowers in from two to three months. If a flat dweller, and you have three or more windows, you can plant ten or more rose bushes in window boxes. The results will be a delight, and you can move the window boxes with other personal belongings, when moving day comes around. If a home owner it matters not how pretentious or humble, nothing can make it more home-like, more attractive and inviting, than a well selected rose planting. If a landlord, there is no improvement that can be made at so small an expenditure that will so quickly enhance the rental value and desirability of property, insuring permanent tenants, as a good rose planting.

Roses are the most popular flowering plant grown. As either plants or flowers, they may be properly and effectively used for a great number of purposes. In the Southern States roses may be had in abundance nearly the entire year; longer than any other flower. We can never have too many roses around our homes; we seldom have enough.

The mild winters, long fall and spring seasons, and abundance of rain during the summer, give the lovers of roses in the Southern States a more ideal climatic condition for growth in the yard or open bed than any section of the world.

SOIL. If the soil is naturally well drained, it will be unnecessary to provide drainage. But nothing is more prejudicial to the health of Roses than poorly drained soil; therefore, if needful, provide drainage. Dig a trench to the depth of 2½ feet, and in the bottom deposit a 4 or 5-inch layer of drainage material so that all surplus water will drain away quickly. It is a good idea to mix with the soil in the bottom of the trench a few broken bones, say a peck, for a bed holding a dozen Roses—they will furnish plant food for the Roses for three or four years to come. A rich, deep clay loam is the best soil. If it contains grass roots, or is made up of rooted sods, all the better; any ordinary soil will answer, providing it is well manured.

MANURES. While manure from the cow-stable is probably best, you can draw upon the horse-stable or pig-sty with equal expectation of good results. Well-rotted leaves are fair, but too light except for heavy soils. Commercial fertilizers, such as bone or guano, may be used to advantage if handled with discretion. A rule to remember is never to let any "green" or "raw" manure come close to the roots of your Roses, but see that it is buried well beneath the root reach, or applied as a top-dressing.

The best time to plant roses is just as the ground begins to freeze in the autumn; let it serve as a protection over winter and dig it in next spring. Even with the best care it may prove necessary at times, say after six or eight years, to renew the Roses or move the bed, adopting the farmer's principle of rotation of crops.

TREATMENT ON ARRIVAL. When you receive the Roses, give them the greatest care; never expose the roots to the drying action of spring winds for a moment. A plant with bare roots exposed to the dry air is like a fish out of water. Should the plants, through delay in transit, come dried out, as occasionally happens, soak the balls of earth and roots in water; if the stems have dried out, after soaking the ball, bury the whole plant in damp earth for several days. This treatment may put them in good condition, while if they are planted when dried out there is danger of their dying.

TIME TO PLANT. The proper time for planting in the various sections of the country largely depends, first

upon the location, and, second, upon the character of the plant. In all sections where frosts are infrequent and the winters mild, pot-grown as well as dormant Roses may be planted in the late fall, as well as in the early spring. In the Southern States fall planting of both these classes of Roses is considered desirable, but, if the conditions are such that it can not be accomplished, then in the early spring months they may be set out with entire safety.

As to where the preference lies between plants that are pot-grown under glass, and dormant, field-grown plants, it is not easy to discriminate. Our own experience has been that in the Southern and Southwestern States, the planting of the one-year-old Roses during the months of February, March and April, according to the location, may be accomplished with splendid satisfaction.

MULCHING. The main object being to retain the moisture rather than to enrich the soil, cultivate the garden once a week up to the middle of July, to maintain a dust mulch; after that, a liberal covering of "long" cow or horse stable manure that will not heat will accomplish this purpose best.

HARDINESS. Hardiness in a Rose is a matter of which no one can speak with positive certainty, because the condition of the weather as a rule prescribes the hardiness of a plant, as quite frequently plants that have been out year after year will be winter killed by unusual conditions. As stated elsewhere, the hardiness of the different varieties of plants can be depended upon to be as near accurate as it is possible for any one to determine.

WINTER PROTECTION. Where the temperature gets below freezing, the less hardy Roses will require protection, and all of them will be better for it, at least about the roots. Soon after the first frost, having hilled up the soil around the stems, cover the Rose beds all over with a 3 or 4-inch layer of good heavy stable manure, and over this a 6-inch layer of leaves, held in place by the most slightly material available. A 12-inch fence of poultry wire will keep the leaves in bounds nicely. If the leaves are not available, straw, corn-fodder and even boxes put over the Roses to shed the rains, will protect from the cold, biting winds and the alternate freezing and thawing of early spring sunshine and cold

Too deep Too shallow and set wrong Just right Right and banked for winter

nights; but do not smother the Roses, for if too tightly covered they will die. Remove the covering gradually in the spring when danger from frost is past.

How to Prune Your Roses

Showing where to prune.

Pruning is the art of improving the productive power and the appearance of a plant. It consists of two distinct operations. 1. The removal of dead, weak, overcrowded, and otherwise useless shoots. Unripe wood which in the spring will usually be found to have discolored pith, caused by the winter frosts, should be cut clean away at the base of the shoot. 2. Pruning Proper, the shortening of those shoots which are allowed to remain after the thinning-out process has been completed.

The most frequent errors made in pruning are: (1) leaving too many shoots when thinning out; (2) pruning severely the shoots of varieties which require little, if any, shortening; (3) pruning lightly the varieties which require severe pruning; (4) leaving Rose plants crowded with shoots and cutting these to a uniform length all over the plant in a similar way that a hedge is clipped.

In thinning out a shoot, it should be either cut clean away to the base of the plant, or to its starting point on the elder shoot from which it springs, as the case may be. When the plant has been pruned, the shoots should be left as nearly as possible equidistant from each other, and regularly arranged around it so that it presents a well-balanced appearance on all sides.—National Rose Society's Handbook on Pruning.

Diseases and Insects

MILDEW—This disease very frequently attacks the foliage of Roses, especially the Crimson Rambler. It is shown by a grayish crinkling appearance of the leaves and usually occurs after a change in the temperature. It can be checked to a certain extent by sprinkling the leaves with powdered sulphur immediately after its appearance. If, however, this does not check it, dissolve one ounce of potassium sulphuret in two gallons of cold water and apply a fine spray.

GREEN FLY OR APHIS—A green suckling insect which usually gathers in great numbers upon the tips of the new growth. A solution of tobacco made from tobacco insecticide soap, which you will find offered elsewhere in this book, will exterminate them.

RED SPIDER—Is also a small insect indiscernible to the naked eye, and a frequent spraying with a strong hose is all that is necessary.

LEAF ROLLER. Is an insect of yellowish-white color, resembling the butterfly, and lays eggs on the underside of the leaf, which soon form a cocoon, rolling around itself the leaf, hence the name, leaf-roller.

ROSE BUG—A familiar insect, appears in the earliest summer, sometimes in great quantities, and is very troublesome. It is a very destructive insect and usually feeds upon the white petals, but is easily destroyed, especially in the early morning, when they will readily fall into a vessel containing kerosene. They can be poisoned, but it is not a very desirable way to get rid of them. This is to spray with wood alcohol, which will kill any insect by contact, operates quickly and does not injure the flower if applied in a mist-like spray. Care should be exercised by the operator not to inhale any of the fumes.

BLACK SPOT—A fungous disease, appearing as its name indicates as a black spot upon the leaf, eventually turning yellow and falling. It rarely occurs in the early part of the season, and the Teas are almost, but not quite, exempt from its ravages. The best preventative if your bushes have been troubled by it in the past is spraying in April before the foliage has developed and not while the flowers are in bloom, because of the discoloration of the foliage. The disease usually appears at the base of the plant and works upwards, so a watch should be kept and as soon as any leaves appear affected with this disease they should be pulled off and taken entirely away from the balance of the plants. If this is thoroughly done it will usually hold the disease in check.

Grape Dust. For mildew, mold or rust mites. Price, ½ lb., 25 cts., postpaid.

Bordeaux Mixture (Dry). For dusting plants affected with mildew and all fungous diseases. Can be used as a spray. 1-lb. box, 35 cts. (makes 5 gallons liquid); 5 lbs., \$1.25, by express.

Slug Shot. Is an Insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Eggs, Cucumbers, Cotton, Tobacco and Cabbage Plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. An admirable remedy for the Black Clematis Bug.

Directions for Use: Slug Shot is an impalpable composite powder, to be dusted upon the plants. It contains Poison, thoroughly diffused through natural fertilizers, and is perfectly safe in its use to man or beast. Price, one-pound package, 25 cents, postpaid.

RUBBER PLANT SPRINKLER. Large size, \$1.10 postpaid.

Bowker's Ammoniated Food for Flowers

A new odorless Fertilizer for Pot plants. Makes plants grow and bloom luxuriantly, and drives insects from the soil.

It starts the plant at once into a healthy and vigorous growth and abundant bloom. It drives worms and other troublesome insects from the soil. It has no disagreeable odor, and is the only artificial fertilizer which can be used without danger or injury to the plants. It takes the place of liquid manure, and is just the thing that has been wanted for a long time.

We have sold tens of thousands of packages of it, and have yet to hear the first complaint. If your plants are doing poorly, get a packet and see how quickly they will be benefited. It acts like a charm. The Ammoniated Food is put up in wooden boxes, with attractive wrappers. One package, sufficient for twenty-five ordinary-sized plants for one year, for 50 cents. Sent by mail, postage prepaid, on receipt of price.

Insecticides

Thompson's Rose Nicotine is chemically pure nicotine and quick death to insects on Roses. Very convenient to use—no trouble, no odor, no staining; simply apply as directed with spray pump or plant sprinkler. Small can, 30 cents; larger size, 60 cents, postpaid.

Tobacco Powder—The Sprinkling Kind for Sprinkling or Dusting Only, is made from heavy black leaf tobacco, strong in nicotine, and so finely pulverized that it can be applied with an ordinary magazine bellows gun direct to plants, indoors or out, or sprinkled around the hothouse to keep the pests in check. Price, one-pound package, 35 cents.

Sulpho-Tobacco Soap. Another splendid insecticide. Directions for use on every package. 3-oz. cake makes 1½ gallons prepared solution, 15 cts. each.; 8-oz. cake makes 4 gallons prepared solution, 30 cts., postpaid.

Hellebore, Powdered White. For the destruction of slugs, worms, caterpillars, etc. Less poisonous than Paris green and London purple, and safer to use. Use as a powder or dissolve one ounce in three gallons of water. Postpaid, ½ lb., 40 cts.; lb., 75 cts.

JOSEPH W VESTAL & SON. LITTLE ROCK. ARKANSAS

COLUMBIA—The Best New Rose of the Year

Could be rightfully called the **Giant Pink**, owing to the enormous blooms it produces. Of distinctive merit, being an extremely strong, rank grower, one of the strongest of the everblooming, blooming as it does with the greatest freedom, the buds carried on long, stiff, erect stems, of the very largest size imaginable in a Rose bloom, open flowers often measuring six inches across, full of petals and of wonderful depth, which it retains in perfect formation. Very fragrant. Color clear imperial pink on the order of the **La France**, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring. Being fully double makes it a fine summer Rose, particularly adapted to garden culture. We feel that after all is said, we have not said half enough for Columbia. Price, one-year, 25 cents; two-year, 75 cents.

Double Ophelia

This new Rose has the brightest future, in our estimation, of any Rose introduced for the last quarter century. The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. Salmon-flesh, shaded with rose. Buds of unusual attractiveness, opening full and double, like the old **Malmaison**, but decidedly brighter. Habit excellent, growth strong produces flowers on long stems, standing well up above the foliage, and in great profusion all summer. Price, 35 cents each; two-year, \$1.00 each.

Freiherr Von Marshall

Wonderfully Strong Growing and Hardy.

As an outdoor Rose it has no superior. It has wonderfully beautiful foliage and produces large, full, beautiful shaped flowers, which are borne in profusion all through the season. Magnificent crimson-scarlet Hybrid Tea Rose with long and pointed hubs; deliciously fragrant. Wonderfully strong growing and hardy. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Freiherr Von Marshall.
Intense and rich in coloring.

Our Roses

Are grown in 3-INCH pots.

They are superior to the young Roses from two-inch pots usually sent out because the larger pot gives ample room for root action and allows the plant to grow naturally. They are sturdy and compact and when sent by express with the soil on the roots, transplanting scarcely checks their growth. The cut shows a fair sample of the two-inch pot plants as usually sent out by the mail trade, (and a fair sample taken from our stock, growing in three-inch pots).

NEW HARDY EVERBLOOMING ROSES

NATIONAL EMBLEM

Owing to its magnificent color and formation, this Rose was named National Emblem, and no Rose in our estimation has a better right to the honor of being the Standard Bearer. Its color is a deep crimson overlaid velvety crimson shading to vermilion toward the edges. Buds long and pointed on stout stems opening full and double, each one coming to perfection and produced in marvelous profusion throughout the entire season. Plants make a gorgeous sight owing to the brightness of the blooms and the luster of the foliage, being entirely free from mildew. A grand garden or bedding Rose. Price, 30 cents each; two-year-old plants, 75 cents each.

Mrs. Theodore Roosevelt

Creamy white, with rose center; bud, long and pointed; flowers very large, full and of splendid form. A vigorous grower. Grand bedder. Its freedom of bloom is most remarkable, beginning on very small plants and continues without interruption. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

HELEN GOULD

It has proven itself to be the strongest growing, freest blooming, largest flowering and hardiest Rose in existence. It is a better Rose for general planting than American Beauty—the dream and hope of every Rose grower for years past. A strong, dwarf, compact grower, absolutely free from disease of all kinds, young plants blooming continuously throughout the year. The flowers are as large as the American Beauty, are full and perfectly double; the buds are beautifully made, long and pointed, produced on long, stiff, erect stems. The color is a warm rosy crimson, the color of a ripe watermelon. Price, 15 cents each; large plants, 40 cents each.

Long pointed buds, rosy crimson in color.

Mrs. David Jardine

A Wondrous, Hardy, Brilliant, Pink Bush Rose.

An exquisite new Hybrid Tea of a shade of brilliant pink not equaled by any other Rose. The color varies from a deep shade in the center to an exquisite salmon tint on the outer petals, with a peculiar soft, pastel effect. Its petals exhale a fragrance only to be compared to the famous Attar of Roses. The lasting quality of the flowers when cut is marvelous. They have been known to keep in perfect condition more than a week in water. A wonderfully vigorous grower, absolutely hardy everywhere, bearing its flowers in great profusion all summer. Price, one-year, 20 cents each; two-year, 50 cents each.

Pernet's Triumph

The flowers are extra large, having broad, thick petals and long tapering buds, with delicious fragrance. Color, a fine clear magenta red, sometimes passing to bright crimson. The flowers retain their beauty for a long time. Price, 15 cents each; two-year-old plants, 30 cents each.

President Carnot

It is a Rose of the largest size, beautiful both in bud and open flower. The buds come on long, stiff stems, in clusters of from six to twelve. Each individual flower stands out distinct on its stem.

No crowding as in the case of so many Roses that bloom in clusters. The color is distinct and novel, a lovely fawn, shading to pearl. It often measures five to six inches in diameter. We have no hesitation in saying that this charming Rose will become as popular as La France, as it has all the good qualities of that Rose, and at the same time is so distinct that it attracts immediate attention. It is, indeed, a wonderful Rose—one that everybody can grow and bloom. Price, fine young, strong plants, 15 cents each; fine two-year-old plants, 40 cents each.

Mme. Cecile Berthod

Deep golden yellow Rose. Most beautiful, both in bud and flower, which is deep golden yellow. In fact, the deepest yellow in color of any Rose we grow. The foliage is very bright. This is a Rose of magnificent size and color. Price, 15 cents each; two-year-old plants, 35 cents each.

Lady Battersea

This variety has long oval buds, sharply pointed, very striking in form; the color is bright cherry crimson; the stems are stiff and extremely long for a red Rose; a vigorous grower; not very full, but an unusually showy variety; the only red Rose approaching Niphetos in form; color, brilliant, and unusual. Price, 10 cents each; large two-year-old plants, 35 cents each.

Kind Friends: Your pleasant surprise box of plants sent me came yesterday. The plants were in good condition and a better assortment I never saw, and so many for the price. I am greatly proud and pleased with them. Thanking you for your good selection and promptness, I am still remaining yours for success. MRS. M. C. JENKINS, Kansas City, Mo.

PINK RADIANCE AND RED RADIANCE

In the Radiance Roses are found all the good qualities that go to make an ideal garden Rose—grand size, handsome form, free flowering, hardiness, pleasing colors.

RADIANCE

MAGNIFICENT ROSE.

(Giant Flowering, Handsome in Form and a Wonderful Garden Rose.)

This grand, giant-flowering Rose stands head and shoulder above all other Roses of its class. The flowers, which are of splendid form, are large and full, and somewhat of the June Rose type. The buds are particularly handsome in form, the full blooms large and double, the petals of immense size and the blossoms are highly perfumed. The growth of the plant is vigorous, making strong canes which are thick and heavy. Radiance is rightly considered a leading Rose of the garden for cutting and successfully competes with many of the finest greenhouse productions as a cut-flower variety. Radiance produces a wealth of heavy, clean, dark green foliage and has the qualities that make it the ideal garden Rose. Price, strong plants on own roots, 20 cents (will bloom the first season); two-year-old plants, 50 cents each.

RED RADIANCE

No Rose has yet equalled, certainly none has excelled Radiance as a garden Rose, when all points are taken into consideration, such as hardiness, freedom of bloom, vigorous growth and character of bloom. In Red Radiance we have an exact replica of its prototype, Radiance, except in color and bud. The color is an even shade of clear red, without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer, being constantly in flower, from early spring until freezing weather. Strong, vigorous, branching grower, each branch terminating in a large, bold, double bloom. Hardy everywhere. Altogether it is a Rose destined to become one of the leading garden Roses of America. Price, one-year, 20 cents each; two-year, 50 cents each.

Gentlemen: As a result of early planting and then later planting, I have had a wealth of lovely Hyacinths, Narcissus, Roses and Violets for the Holidays and all during the autumn. I recommend your Roses to my friends. MRS. L. R. MOSELEY, Stonewall, La.

The flowers of Radiance are somewhat of the June Rose type, immense in size and highly perfumed.

STRIPED RADIANCE

Exceptionally Striking in its Variegation.

Striped Radiance is a sport of the now famous cut-flower Rose Radiance. The flowers are large, ground color soft carmine striped and dashed with creamy-white. The Rose is extremely beautiful in its bud form, being quite long pointed. Habit of growth is vigorous and branching, and this Rose will always prove one of great interest. Really a distinct novelty. Nice one-year plants, 25 cents; 3 for 60 cents; strong two-year plants, 50 cents; 3 for \$1.25.

Striped Radiance is an interesting novelty. Everyone should try.

SIX WONDERFUL RED ROSES

THE NEW
AMERICAN ROSE

FRANCIS SCOTT KEY

"The Rose for Every Garden of Every American Home." "Named in Honor of the Writer of the Star Spangled Banner."

The new American Rose, Francis Scott Key, dazzling crimson, globular Rose of gigantic size. In this new Rose we find the embodiment of a perfect bloom combining size, form and color, the attributes of all exhibition flowers. This new American Rose produces intensely black grain scarlet-crimson blooms on strong shoots of sturdy erect growth, embellished with a foliage of the deepest green. The Rose is deliciously perfumed. In growth it is strong, vigorous and free-branching, with large and handsome foliage. Price of Cochet Roses, one-year-old plants, 15 cents each; set of six for 75 cents; two-year-old plants, 35 cents each; set of six for \$1.75.

White Maman Cochet

A splendid Rose; has all the good qualities of Maman Cochet. Like some other white Roses, this variety, especially in the autumn, shows pink markings on the outside petals when the flower is in bud. When open the blooms are pure white and entrancingly lovely, large, fragrant, hardy and freely produced.

Crimson Maman Cochet

(Etoile de France.)

This well known Rose we have named descriptively Crimson Maman Cochet, because of its vigor of growth, stiffness of stem, heaviness of foliage, freedom of bloom, and hardiness. Bears masses of full, deep-formed flowers singly, on long, substantial stems. The color is a new and clear shade of red or crimson-velvet, brightening in center; of exquisite fragrance. One of the best and sweetest Hardy Hybrid Tea Roses of its color.

Red Maman Cochet

(Helen Gould.)

This is a Rose that will grow and give satisfaction in almost any soil or situation. It produces its splendid flowers in amazing profusion, on long, strong shoots. For vigor and freedom of bloom, thousands of growers regard this Rose as better than American Beauty, and without a peer. The flowers are very full, perfectly double; buds long and pointed. Color is a warm, rosy crimson, hardy everywhere. The exquisite fragrance, beauty of form and hardiness of nature make it ever popular.

Pink Maman Cochet

This superb Rose is well known as a queen among Roses, one of the best and most beautiful varieties ever grown, and quite hardy. The flowers are of enormous size, very full and of great depth and substance. Color, rich coral-pink, elegantly shaded with rosy crimson; has broad, thick, shell-like petals and makes superb long-pointed buds; immense bloomer, and flowers the whole season. Deliciously sweet and a hardy, vigorous grower. It ranks among the very finest hardy everblooming Roses.

Yellow Maman Cochet

We continue to regard this grand kind as absolutely the best, everblooming yellow Rose. It is ideal for open ground culture—a typical Cochet Rose, with gracefully molded buds, flowers magnificent when open, on stiff, strong stems. This kind is identical in every way with Pink and White Cochet, except the color of the flower, which is deep sulphur-yellow.

White Cochet.

A Rose particularly attractive in its bud stage.

Blush Maman Cochet

(Wm. R. Smith.)

This magnificent variety is an American-raised, pedigree seedling. It inherits hardiness, constitution, fine habit, grand foliage and superb flowers. Where there are so many good qualities, it is difficult to emphasize the leading one, but in this variety we would name its ability to resist disease. The color is a deep ivory-white overlaid with a good, bright shade of pink. As a summer Rose it ranks with the best.

SPECIAL OFFER: One each of Pink, White, Red, Yellow, Blush and Crimson Cochet, strong plants, for 75 cents; two of each, 12 in all, \$1.25. Two-year-old plants, one of each, 6 in all, \$1.75, by express.

BEAUTIFUL YELLOW ROSE LADY HILLINGDON

"Everybody Can Grow It."

It has long willowy stems that are in no sense weak, as the buds are held upright; has a long slender pointed bud of brilliant, deep golden-yellow, and a striking peculiarity of this Rose is that each day the golden-yellow color becomes deeper yellow and more intense, unlike all other yellow Roses of which we are familiar, as invariably the tendency after being cut is to get lighter in color. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Perle des Jardins

Pearl of the Garden.

The color is a clear golden yellow, of a beautiful shade, and is entirely distinct from any other variety; the flowers are large, full, of globular form, with great depth and substance, richly perfumed, and very beautiful in every way. This magnificent Rose still holds its position as one of the most exquisite and beautiful of its color ever introduced, and the demand for it is constantly increasing as its great value becomes known. It is ideal for cutting purposes. A particularly fine garden Rose, being strong and thrifty. Price, one-year-old plants, 10 cents each; two-year-old plants, 30 cents each.

Helena Cambier

Of unusual beauty, with large, double, beautifully formed flowers, the colors are varying, ranging from salmon-rose to coppery rose; very often a handsome saffron hue. As the flowers expand, the colors become lighter. A most remarkable sort in every respect and one to which we give our highest endorsement. Good everywhere, especially in the South. Price, one-year plants, 15 cents each; two-year, 40 cents each.

Lady Hillingdon.
The Faultless Yellow Rose.

Virginia R. Coxe.
"A Fine Bush Rose of a Fiery Color."

This magnificent Rose was originally sent out from Germany as a Yellow Kaiserin Augusta Victoria, it having all the beauty of form and substance of that great garden Rose. The color is a rich canary-yellow with shadings of saffron. The flowers are massive in size, full and double, with the petals elegantly recurved. It is one of the finest garden Roses, being perfectly hardy. Price, one-year-old plants, 20 cents each; two-year-old plants, 40 cents each.

VIRGINIA R. COXE

For intense and dazzling color there is no other Rose to compare with this splendid kind. The flowers are large and handsome, moderately double, of splendid substance, and are produced in amazing profusion during the whole of the growing season; in fact, it is always in bloom. The color is fiery crimson, shaded with a dark velvety sheen, a combination found in no other Rose.

The fragrance of Virginia R. Coxe Rose is unexcelled by that of any other variety under cultivation. It is a strong and sturdy grower, often attaining a height of four or five feet, is perfectly hardy in all sections and is one of the finest of many splendid Roses that have come to us from Europe. Price, 15 cents each; two-year-old plants, 40 cents each.

THE BEAUTIFUL LA FRANCE ROSES

The La France Roses are of the highest merit, and each member of the family has particularly strong points. Practically hardy everywhere, they are splendidly adapted for general planting.

Price of all the La France Roses, 15 cents each, 4 for 50 cents; two-year-old plants, 40 cents each.

LA FRANCE. This is probably the most popular Rose in cultivation. Both buds and flowers are of lovely form and grand size, exceedingly sweet; color fine peach-blossom, elegantly clouded with rosy flesh. Begins to bloom while very small, and continues bearing until stopped by freezing weather.

WHITE LA FRANCE. A seedling of La France; extra large, full, deep, pearly white flowers, delicately shaded with soft rose; exquisitely beautiful and delightfully fragrant.

RED LA FRANCE. This is a superb Rose, belonging to the Hybrid Tea class, and closely resembles La France, but much deeper in color and a better grower; the flowers are extra large, exceedingly beautiful, very double and full and deliciously sweet; color lovely rose-pink, very deep and exquisitely shaded; a constant bloomer.

THE STRIPED LA FRANCE. An elegant new Rose, closely resembling La France in form and substance, but the flowers are distinctly striped with pearl-white and satin-rose.

Florence Forrester

FLORENCE FORRESTER. Clear snow-white with a lemon tinge; as the flowers age they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal. Is very sweetly perfumed. Beautiful long pointed buds on tall stiff stems. An excellent Rose for cutting. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

AMERICAN BEAUTY

The World Famous Rose.

If any Rose has earned the title of the "National Rose," it is the American Beauty. Wherever this Rose is known, it is the queen, and it surely deserves the name. Beautiful, fragrant, enduring, it is and always shall be, the Queen of Roses. In size, color and form it has no equal. This Rose has become as famous as the Marechal Niel. The flowers of this grand Rose are so eagerly sought that they sell in the flower stores of the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. Indeed, the market is never fully supplied with them even at this high price. It is because of its large size, rich color and delicious fragrance. It is a hardy Rose of the largest size, having the everblooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose. It is the sweetest of all Roses. In color it is a deep brilliant red, shading to a rich, carmine crimson. American Beauty is, like Marechal Niel, difficult to start from small plants, therefore we advise our customers to buy strong plants of it. This Rose will never be sold cheaply, for the reason that it is hard to propagate. Price, large 2-year-old plants, 50 cents each; extra large 3-year-old plants, \$1.00 each.

American Beauty.

Considered the Largest Flowering Rose Grown.

Dwarf Polyanthus Roses

Plant Baby Ramblers for Bright Edging. They Bloom Unceasingly.

These are entirely distinct from the larger flowered Roses and there is a place for both in every garden, being so hardy and adapted to so many uses. Masses of 25 or more together will be found to make a very effective planting.

The Famous Crimson Baby Rambler

One of the most useful and ornamental Roses yet introduced. It blooms in immense clusters similar to Crimson Rambler, every day in the year, but grows only 20 inches high. Better than an azalea, it is superb for single specimens, dwarf hedges and for bedding. The color is clear and brilliant ruby-red; foliage dark and glossy. Free from insects and absolutely hardy everywhere.

Pink Baby Rambler

Orleans Rose.
The showiest and prettiest of the pink "Baby" Roses; this charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom, deep cerise, with showy center of pure white, florets not crowded, but of beautiful arrangement.

Double White Baby Rambler

A most beautiful companion to the Crimson Baby Rambler, growing to the same height, and bearing great masses of double, pure white flowers, covering the plant as with a mantle. The Roses are delightfully scented, reminding one somewhat of a hyacinth.

Baby Tausendschon

A dwarf form of the Climbing Tausendschon or Thousand Beauties. It has all the characteristics of the climber in the charm of its flowers, but blooming the entire season. Flowers firm, white, delicately flushed pink, changing to deep rosy-carmine.

Price of all Baby Ramblers listed on this page: One-year-old plants, 15 cents each, \$1.50 per dozen; two-year-old plants, 35 cents each, \$3.00 per dozen.

Erna Teschendorff

The color of the flowers is the brightest red. The flowers are large and very double and are produced in constant succession throughout the whole season.

Mrs. Wm. Cutbush

Of dwarf growth, producing in constant profusion flowers of pale pink, borne in huge trusses throughout the entire summer and autumn. Hardy.

Bonnie Belle

Enormous trusses of dark cherry-red flowers. Unusually long buds for a Polyantha. Worthy of trial.

Geo. Elger

A superb Polyantha Rose with just sufficient of Tea Rose blood to make it different from any in its class. It produces great quantities of lovely little buds of golden yellow, opening into miniature symmetrical Roses. Each bush is so loaded with blooms that they resemble a huge bouquet. Like all Roses of this class, it is free in growth and bloom, blooming all summer. Hardy everywhere with some protection. Foliage bright, attractive green. Excellent companion for the Baby Ramblers.

Jessie

This new Baby Rambler is an ideal Rose for massing, bedding or for pot culture. The flowers, which are produced in huge clusters, are of a bright cherry-crimson color which does not fade. Superb. The best of all the Baby Ramblers for pot culture.

VESTAL'S "SUNNY SOUTH"

Set of four distinct Everblooming Roses shown on next page.

In the "Sunny South" Collection of Everblooming Roses named below we offer four choice varieties especially adapted for outdoor bedding. They combine the greatest variety of form and richness of color it is possible to get in that number. All are free blooming and delightfully fragrant. For vigorous growth, freedom of bloom combined with hardiness, fragrance, healthy and abundant foliage, they are unexcelled. The smallest or third size are sturdy plants from 3-inch pots and will, under ordinary conditions, give an abundance of bloom this season, but the larger sizes will, of course, bloom earlier, more profusely and should produce larger flowers on longer stems.

Mrs. George Sawyer

It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. Price, one-year, 15 cents; two-year, 40 cents.

The Bride

Standard White Rose, Exquisite form and Color.

There is no other white Rose more satisfactory than The Bride. The buds and flowers are unusually large, well formed and deliciously perfumed. When planted in the open ground the flowers are sometimes found to be delicately tinted with pink, making it exceedingly attractive. Of strong and healthy growth; a profuse bloomer. Its blooms are of the most suitable form and quality for cut-flowers. Price, 1-year-old plants, 10c each; 2-year-old plants, 35c each.

Bridesmaid

The Favorite Pink Tea Rose.

More plants of this are cultivated by the amateur, and more cut bloom is sold by the flower dealer, than any pink Rose. The buds are of exquisite shape, solid and firm, and the stems are so long and stiff that no other Rose will compare with it in keeping qualities after being cut. Price, 1-year-old plants, 10c each; 2-year-old plants, 35c each.

Dear Sirs: The Roses came in fine condition and are doing well. Many thanks for your promptness in filling my order and for the gratis Rose which bore no name. Sincerely, MRS. J. E. H. McIVER, Caldwell, Tex.

MADAME JULES GROLEZ

Red Kaiserin Augusta Victoria.

One of the very best of the new Roses, and one that has so many good qualities that we are quite certain it will find a place in the garden of every flower lover. It has been thoroughly tested by us and we have formed such a high opinion of it that, this year, we have grown an unusually large stock in order to give the Rose the widest possible distribution. Mad. Jules Grolez is an exceedingly free-blooming variety, with very large, finely formed flowers. The color is distinct and charming shade of cherry-red. The fine form and attractive shape of the flowers make them excellent for cutting. Like Kaiserin Augusta Victoria, Mad. Jules Grolez is a Rose of great value for open-ground culture. It is a remarkably strong growing variety, as hardy as the Hybrid Perpetuals, free-flowering and in every way excellent. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Crimson Queen

"The Greatest Advance In High Colored Roses."

(Summer blooming, hardy with protection). The color of this Rose is intense crimson, changing to crimson-maroon. It is extraordinarily free growing and free blooming. A very superb variety. The flowers are perfect in form and shape, being full and double to the center and having long stems for cutting. A strong robust grower. A Rose that will take the place of every other Rose in this color, and it is the greatest advance in high colored Roses yet raised. It is delightfully sweet scented. Price, one-year-old pot plants, 20 cents each; two-year-old plants, 50 cents each.

Robin Hood

This new Rose has a glorious rosy-scarlet color that is at once soft and bright and lasting; the bloom is full and of beautiful build. It is a grand grower, heavy caned and profuse in foliage; flowers very freely produced. Price, 15 cents for one-year plants; 40 cents for two-year plants.

Mrs. B. R. Cant

This Rose is an extremely strong-growing variety, producing heavy stems, with large, healthy foliage and flowers almost the equal and style of Helen Gould, but more double; deep rose, with silvery rose center. A bright, clear garden Rose, and a prolific bloomer, especially good for outdoor cultivation. Delightfully fragrant. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Clara Watson

HOOSIER BEAUTY

"Recognized as One of the Great Introductions."

The color is a deep rich velvety crimson. The velvety blooms with huge petals form a revelation in coloring. The flowers are faultless and perfect, large and quite full, beautifully arranged and of wonderful depth and substance. It is a Rose of unusual make-up. The growth is sturdy, uniform and perfect and the blooms which are held rigidly upright are of the most delicate and sweet perfume. It is a continuous bloomer and is a decorative Rose of the highest value, and has been recognized as one of the great introductions for garden and cut-flower purposes of recent years. Price, 20 cents each; two-year-old plants, 60 cents each.

White American Beauty

The best White Rose in existence. Pure snow-white, with long buds and immense, perfectly double flowers, 4 to 5 inches across, with wax-like petals and very durable. It is one of the most continuous-flowering Roses in this excellent class. Hardy everywhere that Roses grow. Good for cutting and for garden decoration. The Garden, England, says: "White American Beauty is universally admitted to be the finest White Rose in cultivation." Price, one-year, 25 cents; two-year, 60 cents.

Mrs. George Shawyer

This is one of the newer varieties introduced by the growers of Lady Hillingdon. We have not seen a Rose that has met with such universal appreciation by both the amateur and professional grower, and has won awards in almost every place shown since it was introduced, both in this country and Europe. The color is one very hard to describe, being a shade of brilliant clear rose or bright peach-pink. It is a wonderful grower and bloomer, producing great numbers of strong shoots, each shoot tipped with a bud. The flowers are very large, well formed and full, petals of good substance. A very fine garden Rose, as well as a forcing Rose. Price, one-year-old plants, 15 cents each; two-year-old plants, 50 cents each.

Mad. Abel Chatenay

Grand Perpetual-Blooming Rose.

This splendid Rose is one of the very best of its color—rosy-carmine, with darker shade. It does remarkably well in the open ground, has wonderfully beautiful flowers, which are full, deep and double. A very hardy Rose. Chatenay is a strong grower and free bloomer and has won friends wherever it has been planted. We have a large stock of superior quality, and urgently recommend all our customers to include Mad. Abel Chatenay in their Rose orders for this spring. Price, 15 cents each; two-year-old plants, 40 cents each.

Hoosier Beauty is a New Rose of Wonderful Brightness and Charm. Brilliant Crimson in Color.

MADISON---Immense Flowers of Clearest Snowiest White

Madison is one of the very best of the new Roses, and one that has so many good qualities that we are quite certain it will find a place in the garden of every flower lover. It has been thoroughly tested by us and we have formed such a high opinion of it that, this year, we have grown an unusually large stock in order to give the Rose the widest possible distribution. The buds are most beautiful, of immense size, and are borne up high on massive stems, and with their round, full, heavy form, carry an air of grace and dignity quite unusual. The flowers are the clearest, snowiest white, and are arranged in the most faultless and symmetrical manner. The fine form and attractive shape of the flowers make them excellent for cutting. Like Kaiserin Augusta Victoria, Madison is a Rose of great value for open-ground culture. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Mlle. Franciska Kruger

A favorite Rose for the garden and the most satisfactory variety in its color. The coloring is strikingly handsome, a blending of deep yellow with coppery yellow and buff shading. Fine buds and splendid flowers which remain in good condition a long time. Price, 10 cents each; two-year-old plants, 40 cents each.

Meteor

An Old Favorite, Always in Demand.

Notwithstanding this famous old hardy favorite has long been grown, it still may be regarded as the most beautifully formed, brilliant velvety crimson variety now in cultivation. Beautiful buds and flowers, very large and exquisitely made. The bush is remarkably vigorous in growth, perfectly hardy and constantly in bloom. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

William Shean

"Very Free Blooming and Distinct."

This is one of the most unique of Roses, both in color-tones and contrast. The flowers are a beautiful pure pink, with delicate tinting. The flowers are of immense size and substance, and of perfect form. The plant makes a sturdy, well formed bush that will give satisfaction anywhere. Very free blooming and distinct. Price, strong one-year-old plants, 20 cents each, three for 50 cents; two-year-old plants, 40 cents each.

Suzanna Blanchet

One of the best Roses. Outdoors it grows splendidly, and blooms with such freedom as to make it one of the most satisfactory Roses for general cultivation. Color beautiful pale flesh, passing to silvery white, shaded with fine rosy amber; large finely pointed buds. Price, one-year-old plants, 10 cents; two-year-old plants, 40 cents each.

My Maryland

Beautiful in Bud and Flower.

A Rose of delightful color, distinctive shape and superfine quality, which appeals to many on account of its name. In color it is an exquisite shade of pink, the buds and flowers being most beautifully formed and borne on long, stiff stems. The bush is extra strong, hardy and a most prodigious bloomer. Price, one-year-old plants, 15 cents each; two-year-old plants, 50 cents each.

OPHELIA

This new Rose has the brightest future, in our estimation, of any Rose introduced for the last quarter century. The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. Salmon-flesh, shaded with rose. Buds of unusual attractiveness, opening full and double. The illustration conveys but a faint idea of its beauty and formation, which is of large and perfect shape. Habit excellent, growth strong, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for forcing or outdoors. Price, 20 cents each; two-year-old plants, 50 cents each, by express.

For Hedge Purposes

American Pillar makes strong canes that grow upright several feet before bending over, therefore a magnificent hedge can be made with this variety without the necessity of providing a support. In May the entire hedge becomes covered from base to tip with the exquisite, delicately fragrant blooms, entrancingly beautiful. Dozen rates, 1-year, 12 for \$1.50; 2-year, 12 for \$4.00.

The combination of colors in the salmon-yellow Rose Ophelia makes it a highly decorative variety.

PRESIDENT TAFT

It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant, and in a class by itself as to color. Mr. Frank Good, who is probably familiar with more Roses than any man in America, says: "Talk all you want to about the Rose President Taft, and then you will not say enough. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

RHEA REID

Great New Scarlet Rose.

After many tests and observations we are prepared to say there is no crimson or scarlet Rose better than this variety and for outdoor cultivation it ranks at the very top of the list. The flowers are exquisitely formed, are delightfully fragrant and the color is crimson-scarlet. Growth is wonderfully strong, sturdy and healthy, which is the important feature after all. It will succeed anywhere and is hardy. A great Rose in the fullest sense. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Edward Mawley

We have no hesitation in stating that this is the finest of all dark crimson Roses, a true perpetual flowering Hybrid Tea, and the most beautiful variety the Rose world has yet seen. The grand novelty has been very aptly named Edward Mawley, in honor of one of the best loved of British rosarians. It is an enormous, big-petaled Rose, much larger than Malanie Soupert, a Rose it resembles in form, but of the beautiful rich color of a Louis Van Houtte, only with a more velvety shading upon the inside of its petals. Price, 15 cents each; two-year-old plants, 40 cents each.

WELLESLEY

"As Fine as a Rose Can Be."

Wellesley is a Hybrid Tea Rose, as fine as a Rose can be; has good-sized flowers and blooms continuously. The bud, when first opening, is a beautiful shade of bright pink and the flower retains this perfect coloring until it drops its petals. Blooms continuously the whole season through, and gives fine stems for cutting. Will stand the winters any place south of the Ohio River, but north of that line it should be protected. It is a very vigorous, healthy grower, carrying the flowers on long, stiff stems. Remarkably free flowering and fine keeping qualities. Price, 15 cents each; two-year-old plants, 40 cents each.

Paul Neyron

Price, 20 cents each; two-year-old plants, 50 cents each.

Miss Mildred Vestal

This superb new Rose is a result of a cross fertilization between "Rhea Reid," that grand red bedding Rose, and "Richmond," the greatest of all red forcing Roses, which insures in their offspring every point of excellence. It has magnificent large foliage, free from disease of all kinds, and is a tremendous grower—one of the best in all our list. The glory of the plant, however, is in the immense deep double flower of a new and clear shade of crimson scarlet. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Marie Delesalle

Price, one-year-old pot plants, 15 cents each; two-year-old plants, 40 cents each.

The growth is vigorous and the flowers large and very full, perfect form, color lasting a long time in perfection, citron-yellow shaded with rosy peach; plump, pointed buds of great size. The parentage, Maman Cochet and Marechal Niel, a sufficient guarantee of royal blood. Price, strong pot-grown plants, 15 cents each; two-year-old plants, 40 cents each.

Lady Alice Stanley.
"A Remarkable Rose in Color and Fragrance."

Everblooming Climbing Roses for the South

These are the Roses so necessary for the home, giving to it, no matter how humble or pretentious, a touch of beauty not to be had by any other form of adornment. They have also a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the grounds, for screening outbuildings and for trailing down over embankments.

MARECHAL NIEL

The Famous Rose.

The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. Price, 15 cents each; stronger plants, 25 cents; two-year-old plants, 50 and 75 cents.

Climbing White Maman Cochet

The Sensational, New, Hardy, Everblooming, White Climbing Rose, Long Sought For.

This is without doubt one of the finest white everblooming Climbing Roses ever introduced, and can be procured from very few concerns. Its scarcity makes it valuable, and it appeals strongly to those who like to have something different from their neighbors. Price, 20 cents each; two-year-old plants, 50 cents each.

Gainesborough

This is a Grand Climbing Rose. We wish all our customers could see its great beauty.

Its delicate colors are hard to describe, being delicately tinted flesh, almost white, and lustrous as satin. When in full bloom it resembles a large, fine, white, fluffy Peony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. Be sure and try this grand Rose; you will meet with no disappointment. Price, 15 cents each; two-year-old plants, 50 cents each.

Dear Sirs: The Trial Collection of Roses were fine and I was more than pleased with them, and they all came in fine shape. Thanking you for your promptness in filling my order, I remain, Very truly yours, MRS. JAS. R. HAUPE, Lenapah, Okla.

A Great, White, Hardy, Everblooming Climbing Rose (or Climbing Kaiserin Augusta Victoria.)

The first white hardy everblooming climbing Rose. It is an offspring of that grand variety, the best pure white hardy everblooming Rose, Kaiserin Augusta Victoria. The flowers are something grand; they are the equal of the finest and most beautiful cut flower Roses; of splendid substance; extra large, full, deep and double, and are produced on long, stiff stems. Buds are long and pointed. In bud and flower it is truly beautiful; has a delicious fragrance—just like cherry blossoms. If you want a quick growing, hardy climber, sure-to-bloom Rose, one that will give you flowers this season, this is the only white variety that will do it. Price, 15 cents each; large size, 40 cents each.

Climbing Wootton

To our mind this great Rose is to be classed with Mrs. Robert Peary and other great climbing varieties for these reasons: It is perfectly hardy, has no weak spots, grows with wonderful vigor, blooms continuously throughout the growing season, produces flowers that are nothing less than superb, both in beauty and in fragrance. If there is such a thing as having one Rose more beautiful than another, we think this variety may be entitled to this distinction. It is a strong, rampant climber, growing in one season to a height of from ten to fifteen feet, with large, heavy, insect-proof foliage. It produces in most wonderful profusion its superbly-formed flowers, which are bright magenta-red, passing to violet crimson, richly shaded. The flowers are large, full and regular, with thick, leathery petals, and deliciously scented. Make beautiful buds. Price, 15 cents each; large size, 40 cents each.

Climbing Clothilde Soupert

Hardy, Everblooming Climbing Rose.

Quick and abundant bloomer and healthy, vigorous growth. The flowers are two and one-half to three inches across, and perfectly double, rich creamy-white, sometimes tinted with blush and borne in immense profusion, the whole growing season from June to November; handsome, glossy green foliage, not subject to insects or disease. Price, 15 cents each; two-year-old plants, 35 cents each.

Climbing Meteor

A superb everblooming climbing Rose. A sport from Meteor, famous for its magnificent flowers. True climbing habit, attaining a height of 10 to 15 feet in a single season. Free, persistent bloomer, with magnificently formed buds and flowers. Dark, velvety crimson, the equal of any Rose in cultivation. Hardy, with protection and will give absolute satisfaction. Price, 15 cents each; two-year-old plants, 40 cents each.

Climbing Gruss an Teplitz

A climbing form of Gruss an Teplitz. Unquestionably one of the finest climbing Roses ever introduced. The color when first opening is very dark rich crimson, quickly changing to bright scarlet, shading to velvety fiery red. The flowers are very showy and handsome. Remarkably healthy and vigorous; almost immune from all diseases. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

IN BUYING ROSES buy them as you would anything else—keeping in mind that the cheapest is often the dearest in the long run. Cheap Roses must necessarily be grown cheaply, therefore buy where you know you are safe, both as regards prices and quality. Our stock for this season's trade was never in better condition or larger supply.

Just the same as American Beauty practically. Large flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance. Borne in the greatest profusion throughout the growing season. Foliage tough and leathery, deep, glossy green, sun and insect proof. The youngest plants attain a height of 10 to 15 feet in a single season. Hardy and as sturdy as an oak in all localities. Splendid in the South. For single specimens, trailing over verandas, for trellises, anywhere and everywhere, this Rose will give the greatest satisfaction. Words of description can hardly do justice to this magnificent Rose. Absolutely true to name, on its own roots. Strong one-year-old plants, 15 cents each; two-year-old plants, 50 cents each.

Dr. W. Van Fleet

Dr. W. Van Fleet bears flowers which, when open, run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed, stems twelve to eighteen inches, and fine for cutting. The foliage is a peculiar shade of bronze green, large and glossy, with spines a bright bronze red. The variety is a vigorous grower, immune from mildew. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Tausendschon or Thousand Beauties

A Grand Hardy Climbing Rose.

A beautiful, new climbing Rose which has leaped into popularity by its inherent merit and beauty. The name "Thousand Beauties" is very appropriate and refers particularly to the wonderful variety of colorings found on any one plant. The flowers are soft pink at first, but as they age the most beautiful shades of carmine-rose, cerise, blush and soft white with a gleam of light yellow, soft crimson and intermediate tints; a combination of charming coloring, which is bewildering. Price, 15 cents each; two-year-old plants, 50 cents each.

American Pillar

The Flowers are single, of immense size, three and four inches across and very durable. They hang in immense clusters all along the branches and make a remarkable sight, a veritable sheet of bloom. The color is a dainty apple-blossom pink, while in the center of each flower is a cluster of bright yellow stamens. This Rose is as hardy as an oak tree, of very strong growth, soon covering any space allotted to it. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Silver Moon

The flowers run four and one-half inches and over in diameter, clear silver white in color, petals of great substance and beautifully cupped. The center is filled with bright yellow stamens, a very attractive feature. It is very floriferous, the plants literally covering themselves with great Clematis-like flowers. They are borne on strong stems, twelve to eighteen inches long, and are delicately fragrant. The foliage is large and abundant, bronzy-green, glossy and practically immune from mildew. Price, 20 cents each; two-year-old plants, 50 cents each.

Last Spring I ordered three one-year-old Roses from you and they were equal in size if not larger than some two-year-old varieties I have bought from other companies, and yours started better.
Respectfully, Mrs. A. D., Mickey, Texas.

KUNTHIANUM. Called Confederate Lily. A larger plant than preceding, as leaves often grow 4 inches broad and 4 feet long. The color is as bright when first planted as at any other time, and this is kept constantly. The color is brightest carmine.

Amaryllis Johnsonii

One of the most gorgeous bulbous plants grown. We have seen specimens of a few years' growth that completely filled a window. Nothing is more showy than this grand plant during late winter or early spring, bearing large flowers of intense crimson with a delicate white feather in each petal. The flower has six lovely petals of thick, crisp, velvety texture, they are rounded, wide and open wide, till the finest flowers are eight and ten inches across. The petals do not curve tightly back as in the Auratum Lily, nor remain nearly closed as in the trumpet of the Easter Lily, but just open wide. The colors are red and white, and the reds vary from a deep vivid, glowing crimson, the color of arterial blood, up through fiery scarlets which burn resplendent to an almost true orange, the color of light and passion combined, then with less yellow and fainter, they shade into lovely pinks. Mammoth Leaved Rex Begonias

"The Most Decorative of the Begonia Family."

We find colors of bright green, silver colored, reddish bronze, as well as varieties of bright rosy plum color. The plants are grown exclusively for the great beauty of their foliage, as they make unexcelled pot plants. The Rex Begonia dislikes our dry atmosphere and bright sunshine, and thrives best in a rather shady and moist situation. The soil should be as near as possible of the nature of a mixture of loam, sharp sand, and well rotted cow manure. The soil should be light and porous. CHOICEST VARIETIES OF CANNAS

High-grade Cannas have for years been one of our leading specialties, and our fields the past season were a gorgeous riot of color from June to frost, and were admired by many visitors. To those who stopped to look closely at individual varieties, the wonderful improvement in Cannas was very manifest. No other bedding plant will give the same uniform good results in our varied and trying climate. They do well in all sections of the country and stand pre-eminently at the head of the list, succeeding in any sunny position in any kind of soil, but responding quickly to liberal treatment. For best results the beds should be spaded two feet deep and a generous amount of well-decayed manure of any kind thoroughly incorporated, and at all times supplying water freely. For best effect plant in large masses of one color, setting out the plants 2 feet apart.

Allemannia

The giant of all Cannas. Produces the largest flowers. The outer petals are scarlet, with very broad, golden yellow border. Inside of bloom is scarlet and dark red. Price, 10 cents each.

For each succeeding circle use six more Cannas than were used in the previous circle and make 18 inches farther away from the center. This variety has been exploited for two years as a novelty, but the demand for it so greatly exceeds propagation, it must still rank with those of first consideration. The color is extremely desirable, being absolutely pure scarlet, with no suffusion, streaks or blotches whatever. A bed of Firebird is not only conspicuous—it is a regular conflagration! Most beautifully variegated purple, scarlet and white. Price, 10c each; \$1.00 per dozen.

BEAUTIFUL DECORATIVE FERNS

These beautiful plants for home decoration vie with the Palms for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Ferns give a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 25 and 50 cents each.

COMPACT SWORD FERN. Fitting companion for the Boston; dwarfer, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 25 cents each; larger, 50 cents each.

WHITMANII. We think this the most popular Fern. Rather dwarf in growth, but graceful, very compact, dense and feathery. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib, and so thick they seem almost crowded. It is a healthy, vigorous grower, constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the older fronds. It is somewhat like Barrowsii, but decidedly more fluffy, more delicate and beautiful. Fine young plants, 25 cents and 35 cents.

PLUMED SCOTTI FERN. (*Nephrolepis Scholzelii*). The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all the merits of that most popular variety, but with the pinnate sub-divided, giving it an airy, feathery appearance. Price, nicely shaped plants, 25 cents; larger 50 cents.

"HEIZERII." This magnificent Fern has never before been offered for sale by any florist or catalogue firm. The New Everblooming
Pelargonium

Easter Greeting

The flowers of Easter Greeting have the large size and the gorgeously rich coloring of the "Lady Washington Geranium." To this is added, in Easter Greeting the habit of continuous blooming, which has made the ordinary bedding Geranium so highly valued. Easter Greeting is the first of a new race and one of the most valuable introductions in recent years. As an Easter plant it rivals the Azalea; but unlike the Azalea, Easter Greeting will remain in full bloom all summer. Each, 15 cents; larger, 50 cents.

Hibiscus Sub Violecea

Fall Bearing Strawberries

Fall-bearing Strawberries seem to be no longer an experiment, as they are becoming essential all over the country, and are making good every place they have been tested. If these varieties are disbudded, until say August 15th to September 1st, and allowed to fruit, they will give large quantities of ripe berries until checked by hard freezing. The two varieties we offer we consider the best.

Price, 25 for \$1.00; 50 for \$1.75; 100 for \$3.00, postpaid.

SUPERB. This is the most wonderful ever-bearing Strawberry ever produced. It out-rials its parents both in large size and wonderful productiveness. Plants are strong, healthy and deep rooters. The fruit is medium to large in size, very firm, uniform shape, bright red, and has the native Strawberry flavor.

PROGRESSIVE. This is the strongest growing plant of all the fall-bearing varieties we have seen. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits, of a dark red color both inside and out.

Gentlemen: I am writing just a few lines to say "My fruit trees and rose plants arrived today in fine condition," and I want to thank you for the nice large trees; also the extra trees and rose plants you kindly sent. MRS. W. H. LANTZ, Muskogee, Okla.

SELECTED VEGETABLE PLANTS

This page and the next one tells you how you can have a successful vegetable garden without waiting for seeds to grow. If you buy the plants from us, ready started, you gain over a month, and have a supply of fresh, crisp, choice vegetables for your table almost before you know it. What a joy it is to step out from your kitchen door and gather from your own yard the vegetables you want, in all their original freshness and delicious goodness!

A few Artichokes—some choice Tomatoes—a sprig or two of Parsley—possibly a Cabbage or Cauliflower—and there's your meal. Such vegetables are not dust covered. Not dried and withered. Not stale and unappetizing. Not handled three or four or five times before they reach you. But clean—and palate-pleasing—right from your own garden to your own table.

You don't need a lot of ground in which to grow a home supply. A few square feet of garden is enough. Order a few plants of the varieties you prefer and you will have fresh vegetables at your command all the year round.

When plants like these are so easily grown—and when the cost of living is so high today—we can not understand why every house-wife does not grow her own vegetables. The cost of growing is practically nothing—and one can not buy such Vegetables as one can pick from one's own garden patch.

The Best New Vegetables, Novelties and Specialties of Merit

Golden Bantam Sweet Corn

Is becoming each year more firmly fixed in popular favor because of its extreme early character, vigorous growth, and surpassingly delicious flavor. It is pronounced by thousands of planters the finest extra-early Sweet Corn ever grown. Although the dry grain is entirely free from any flinty glaze, it is exceptionally hard and firm, hence can be planted earlier than any other true Sweet Corn. The stalks are dwarf and sturdy in habit, growing to a height of four feet; they bear two or three good small ears, which have eight rows of broad yellow grains. Pkt., 15 cts.; ¼ lb., 35 cts.; lb., 60 cts.

Sweet Corn

IMPROVED GOLDEN BANTAM produces a large stalk, as well as an average of two large ears measuring from 8 to 9 inches in length with ten or more rows of large grains. The corn is of strong growth and the large ears are well filled and the grains are exceptionally sweet. The grains are as sweet as the original Golden Bantam, yet remaining soft and tender for a longer period than any early sweet corn. Last year the demand exceeded the supply and we were obliged to refuse many orders. Price, pkt. 15c, ½ lb. 35c, 5 lbs. \$3.75, postpaid; 100 lbs. \$40.00.

Detroit Dark Red Beet

One of the best Beets for the market and home garden. Has a deep, rich color. Full Measure Bean

A Handsome, Round, Smooth, Green-Podded Stringless Bush Bean. Extra Early, Fine Quality and of Delicious Flavor.

This extra early variety, although comparatively new, has been pretty widely distributed, and we have yet to hear anything but praise about its fine quality and other merits; it is in fact an ideal Snap Bean, producing a fine crop of round, straight, solid, fleshy pods averaging 6½ inches long, wonderfully tender and brittle, without a trace of tough interlining, and having no string when broken, excepting when the pods are quite old. The flavor is most delicious, while the delicate green color of the pods is retained after cooking, adding to its attractiveness when served. The plants are of robust, compact habit, unexcelled in bearing qualities, maturing the crop very regularly. It is extra early, the pods being fit to pick four days before other varieties of approximate size. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cents.

Cauliflower

Pkt., 25 cts.; ¼ oz., \$1.00; oz., \$3.50.

EARLY SNOWBALL. Produces large, handsome heads, measuring eight to ten inches across; pure snow white; close, compact and of the finest quality. The stalks are short, of compact growth, and can be planted closely. It is extra early, a very certain header, and equally good for a late crop. Unsurpassed by any strain offered.

EXTRA-EARLY ERFURT. The plants may be depended upon to form large, firm white heads; very early.

When heading, tie the outside leaves loosely over the head to protect it from the sun.

Collards

Pkt., 10 cts.; 1 oz., 30 cts.

GEORGIA SOUTHERN, or CREOLE. Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves their quality. Sow thick in drills, in rich ground, transplanting when four inches high, or sow in drills where the plants are to remain and thin to two or three feet apart, in the row when of proper size. In the South sow from January to May, and August to October.

Chinese or Celery Cabbage

This vegetable is called Pe-Tsai, or Cut Cabbage, by the Chinese gardeners, and is beginning to attract attention in America. It does not form a cabbage head, but when grown to its full size resembles the Cos Lettuce, and the outer leaves may be used during its growth. The flavor is mild, and it is used either as a salad or cooked. Pkt., 10 cents.

Pimento Pepper

Thickest Fleshed of All Peppers—The Solid Meat Is Always Sweet.

The fruits are rich crimson-scarlet in color, while the form is very distinct, being of regular conical shape, as shown in the illustration. The peppers measure from 2 to 2¼ inches across at the stem end and average from 3 to 3½ inches in length. The skin is perfectly smooth, without any ridges. The peppers are never hot in any part of the fruit, even the flesh around the seeds being sweet. The fruits are just the right size for stuffing for individual use. The plants branch freely, and produce a heavy crop. We feel sure that the New Pimento Pepper will quickly become very popular. Pkt. 10c, oz. 50c.

Iceberg Radish

Finest Long White.

Finest and longest of the very early, pure white varieties; ready for use in 20 to 25 days. This Radish is not only crisp and tender when young, but retains these qualities until the roots attain large size, so that it will remain in fine condition longer than any other first-early variety. Is excellently adapted for forcing purposes or successive sowings in the open ground. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

Iceberg Lettuce

A beautiful Lettuce, with large, curly leaves of a bright, light green, with a very slight reddish tinge at the edges. Handsome heads, unusually solid because of the natural tendency to the large, strong leaves to turn in, which also causes thorough blanching. Crisp, tender and fine flavor. Pkt. 5c, ½ oz. 10c, oz. 15c, ¼ lb. 50c.

New Davis Perfect Cucumber

Davis Perfect Cucumber resembles a hot-house Cucumber so closely that dealers can not tell the difference, it being equally good for hot-house or outdoor culture. It is ideal in shape, rich, dark green color, uniform and regular in size. It is exceedingly tender, and as a slicing Cucumber for the table is unsurpassed. It is almost seedless one-third of its length from the stem end, and the seeds contained in it, when in slicing condition, are so small and tender that they are almost unnoticed. Exceedingly productive. Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; lb., 85c.

IMPORTANT NOTICE

SHIPMENTS OF PERISHABLE GOODS can only be made at your risk. When forwarded by Wells-Fargo, American or other railway express lines, and freight. For twenty-eight years it has been our custom to guarantee the arrival in good order of perishable plants, roots, and cold storage bulbs. This custom for the present period we regretfully are obliged to change. While we will continue to supply and carefully pack such merchandise, we do not wish to hold ourselves responsible for the delays and negligence of transportation companies.

If shipments arrive in bad condition, accept them and receipt for them accordingly, and make claim for your loss on the transportation company. We, of course, will hold ourselves ready to assist you in any possible way. It has been found that claims can be collected more readily by the person receiving the goods than by the shipper.

Our custom to guarantee the actual arrival of goods, except at points where there is no freight or express agent, will still be continued, and claims for loss or non-arrival of merchandise not perishable will as in the past be cared for by us, so you run no risk of having to make claims for lost goods.

SUPERIOR VEGETABLE SEED

STANDARD VEGETABLE SEEDS

Under this heading we offer standard varieties of vegetables. All our seeds are put up in liberal packets, with full cultural directions upon each. We pay the postage on all seeds ordered by the packet, ounce, quarter-pound, half-pound and pounds, and we guarantee safe delivery in all cases.

As to Our Packets of Seed. The average packet selling at 5 cents postpaid is too small. We, therefore, prefer to put up a more liberal quantity and sell at 10 cents. This is very much more satisfactory, both to you and to us. All seedmen have now adopted the rule of selling all seed by the pound. A quart of Beans or Peas is equal to about two pounds.

Pkt., 15 cts.; 1/2 lb., 35c; lb., 50c.

Burpee's Improved

Plants True Bush; No Poles, No Stakes

This has uniformly larger pods than Burpee's Bush Lima, while the pods contain more Beans, which are thicker and remain green even in the dry stage. The plants are very prolific, bearing pods in clusters of from 5 to 7. The individual pods average 5 to 7 inches long and contain from 5 to 7 Beans. The Beans are exceedingly thin-skinned and of delightful flavor. They almost "melt in your mouth," to use a popular expression.

Fordhook

Enormous Pods and Beans; Equaling Those of Pole Limas.

The Fordhook is entirely distinct in habit of growth. The stiffly erect bushes branch freely and bear tremendous crops. It is ready for use as early as the popular Burpee's Bush Lima, but the Beans are much plumper and remain green much longer. The shelled Beans are very fat, are closely packed in the pods, which shell very easily. Pods are borne in clusters of from 4 to 6, average 4 to 5 inches long and contain usually 4 tender Beans of a delightful flavor.

LARGE-SEEDED POLE LIMA BEANS

Packet, 15c; 1/2 lb., 35c; 1 lb., 60c.

Prodigious Yields; Early and Continuous.

EARLY LEVIATHAN. This will not only give large Lima Beans earlier than any other strains, but is also much more productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods differ from those of other early pole Limas in being straighter and longer. The pods hang out from the foliage in large clusters and contain three or four and sometimes five large beans to the pod.

Delicious Green Limas; From July Until Frost. Quality and Flavor; Tender, Rich and Buttery—The True Lima Taste.

KING OF THE GARDEN. A strong grower and uniformly large podded. The pods frequently contain five to six very large beans. These beans are of excellent quality, easily shelled; large, handsome appearance.

CHALLENGER OR "POTATO" LIMA. Vines are very productive, but pods mature later than the large flat sorts. The pods are produced in large clusters, and average three to four inches in length; they are quite thick, containing three to five beans, the ends of which are flattened by being crowded closely together. They are of excellent flavor.

SMALL-SEEDED POLE LIMA. These are highly esteemed throughout the South as "Butter Beans," and well worth growing North, as they are hardy, early, and extremely productive. They also make good winter shell-beans.

CAROLINA, SIEVA OR SEWEE. (The "Butter Bean" of the South). These grow quickly, mature early, are immensely productive, and continue in bearing throughout the season. The vines are slender, with rather small, shiny, dark-green leaves. Pkt. 15 cts.; 1/2 lb. 30 cts.; lb. 50 cts.

CUCUMBERS

Pkt., 5 cts.; oz., 15 cts.; 1/4 lb., 50 cts.

ARLINGTON WHITE SPINE. Beautiful in shape, color and of the finest quality. The fruit is long cylindrical, dark green with very white, crisp and tender flesh of excellent flavor. In the United States the Arlington is used more, perhaps, than any other variety.

Corn, Sweet or Sugar

Pkt., 15 cts.; lb., 60 cts.

CALIFORNIA GOLDEN COUNTRY GENTLEMAN CORN. This is a wonderful combination of the "Cream and Honey" Sugar Corn and the well-known "Country Gentleman" Sugar Corn. Could you possibly think of anything more delicious than the good points of these two corns combined into one? Don't take chances of forgetting it—send in your order today certain.

HOWLING MOB. This is one of the new varieties that has attracted much attention by reason of its many good points. This is the largest eared Early Sweet Corn in existence, producing two fine large ears to the stalk.

Everbearing Tomato MY MARYLAND

The Earliest, Largest, Most Prolific and Meatiest Red Tomato Grown.

Wonderfully prolific new Tomato. Clusters average 15 fine, large red or scarlet Tomatoes, and the beauty of it is that they all run about the same size, absolutely free from the acidic taste so common in most varieties. Seed-cavities are exceedingly small, we believe it to be the meatiest Tomato grown. This Tomato combines all the good qualities of each parent—earliness of the Earliana, size from Ponderosa. When cut by the frost there is still plenty of green fruit on them. Originator's own stock. Pkt. 20c; 2 pkts. 35c; ¼ oz. \$1.00.

Ponderosa—The Giant Tomato

The largest variety of practical value. The plants ripen early and bear well until very late; very solid, almost seedless, of good sub-acid flavor and of immense size, frequently weighing considerably more than 2 pounds. Somewhat scattered on the vine, and a small percentage are rather rough. Our strain, however, is now producing a much smoother fruit than when first introduced. Good Tomato for home use; splendid slicer. Pkt. 10c; ½ oz. 40c; oz. 75c.

New Globe

This new Globe or Ball shaped Tomato is ideal for the home garden; it is excellent for slicing without waste, one slice like another. The rich, juicy, meaty tomato flavor gives a certain zest and joy in the eating. The vines ripen the first fruits with the second earlies, they yield a heavy crop and continue to bear until frost. Price, per packet 10c; ½ oz. 35c; 1 oz. 60c.

Crimson Cushion

Or Beefsteak Tomato, is very large, round and regular; bright scarlet skin, flesh solid, best quality, seed cells small and few. Plants are very prolific, fine appearance. Price, per packet 10c; ½ oz. 35c; 1 oz. 60c.

Earliana

The earliest smooth, bright-red Tomato of good size. It has been developed in the light, warm soil of Southern New Jersey, where effort is made to market Tomatoes at the earliest possible date. It is so far superior in hardiness, sure-setting of fruits, size and smooth uniform shape, now practically controls the markets of our Eastern cities during the last week of June and the month of July. The plants are compact in growth, with short, close-jointed branches, setting fruits very freely. With our strain the Tomatoes are quite uniform in size and of smooth regular form, averaging three inches in diameter and from two to two and a half inches in depth; they are fleshy, solid and excellent for shipping purposes. Price, per packet 10c; ½ oz. 35c; 1 oz. 60c.

Vestal's Special Blend Spencer Sweet Peas

If Planted Now They Will Blossom Forth in a Riot of Brilliant Beauty During May and June.

Among recent sweet pea novelties there has appeared nothing finer than the new race of Orchid Flowering or Countess Spencer Peas.

They are distinguished for their gigantic size—usually measuring two inches across. The bold, erect standards, which are uniformly waved, crimped and fluted in exquisite fashion, the charming blending of harmonious colors, the exceedingly long stems, which make them excellent for cutting; the great profusion of flowers and the large number on the stems, usually three or four, make this type so superior in every way that we believe it is certain to supersede the old varieties.

The Sweet Peas in our SPECIAL SPENCER BLEND are made up of the finest named Spencer varieties and range in color from the purest white to shades of pink, lavender, blue, yellow and crimson, and are just the kind to make your garden a success.

It is the very best blend possible to produce and will surely delight all who want a great variety of colors.

Price, per packet of 110 to 125 seed, 20 cents; per ounce, 50 cents, postpaid.

CULTURE — The culture

is very simple. Plant seed 3 to 4 inches deep in the most convenient place you happen to have, very early in the

spring—just as early as possible—February, March or April—according to the season and locality. Keep the ground loose and mellow; give the young plants some support to climb on—wire netting, twine or brush. Keep the flowers picked off as fast as they open (this is very important), and they will bloom abundantly for weeks.

Extra Early Flowering Sweet Peas

Any of the following varieties of Sweet Peas may be brought into flower from forty to sixty days after planting the seed. These varieties are called winter blooming kinds by florists who grow them in greenhouses. They also are used for the earliest outdoor blooming. Per packet, 15 cents; per ounce, 50 cents.

BURPEE'S EARLIEST WHITE. Flowers purest white. An abundant bloomer, flowers appearing forty-five days after seed is planted.

BURPEE'S EARLIEST OF ALL. Blooms forty-five days after seed is planted in the ground. Color light pink and white; dainty.

MRS. CHAS. H. TOTTY. Flowers of a beautiful sky-blue or light lavender. Unusual size, lovely color.

LEMARQUIS. Is an early flowering type, navy-blue; very fine.

EARLIEST SUNBEAMS. A very desirable variety for early flowering. The flowers are of rich primrose color, generally borne three on a strong stem.

VESTAL'S GIANT SPENCER SWEET PEAS

Price, per packet, 15 cents; per ounce, 50 cents, for any named Spencer Sweet Pea.

Asta Ohn

Pinkish lavender, the wings showing a little more clear lavender. Good size and best Spencer form.

Blanche Ferry Spencer

The popular old "painted lady" pink and white Sweet Pea in magnificent new form.

Beatrice Spencer

White, tinted with soft pink and buff on standard, while the wings have prominent blotches, of a brighter pink near base.

Countess Spencer

The original Spencer type Sweet Pea and to the present day one of the best pinks. The color is bright clear pink on white ground. The pink deepens towards edge of standard. Standard and wings beautifully waved. Strong grower and bears numerous fours.

Florence Nightingale

Clear lavender with a little mauve color in flower.

Florence Morse Spencer

Beautiful light pink, deepening towards edges. Very large, open, wavy form of the best Countess Spencer type, with long stems and four blossoms to the stem. Perhaps better described as a light, pink-edged Countess Spencer. Our new strain of it comes perfectly true.

George Herbert

Bright rosy carmine of large size and best Spencer form.

Helen Lewis

Standard orange, wings rosy salmon. Large, wavy. One of the earliest Spencer varieties and still a favorite.

King Edward Spencer

Rich crimson, waved. Flowers are large and of fine Spencer form. It is a vigorous grower and is a good variety for exhibition and for garden.

King White

A superb white. Purity of whiteness and vigor, form and size remarkable, substance wanting. This is a grand Pea for dry climates but is too thin where rains are frequent during blooming time.

Othello Spencer

The popular shade of deep maroon, very rich and unusual, immense flowers much crinkled. One of the varieties of the Sweet Pea family.

Primrose Spencer

Both standard and wings are of beautiful, soft Primrose or creamy yellow color. Flowers are very substantial and in a class of their own in both color and size.

Royal Purple

The best Purple Spencer Sweet Pea. As the name suggests the color is near "Royal" Purple. The color deepens and improves as the flowers age which is a good point in a purple variety. One of the most distinct and successful Spencer introduced. A strong grower and very floriferous, excellent flower.

Senator Spencer

The combination of color in the flowers is charming—a deep claret or chocolate, striped and flaked on a ground of light heliotrope. Both standard and wings are extra large, wavy and drooping. Flowers are usually borne four to the stems.

Vermilion Brilliant

Scarlet, waved. To date this is one of the best Scarlet Spencer. The color is a rich scarlet but has some crimson in it. It is a vigorous grower for a scarlet and flowers are of good form. A good number of four bloomed sprays are produced.

Wedgewood

Wedgewood is a unique shade of lovely light blue. The flowers, of good size and substance, are well waved in both standard and wings; they are borne almost uniformly in four-flowered sprays upon long stout stems.

White Spencer

This stock was the first waved white variety. Is conceded to be the best.

Yarrowa

The flowers are exquisitely waved and when well grown average two and one-half inches in diameter. They are produced usually in fours on extra long, strong stems. The color is a bright rose-pink with a clear, creamy base, the wings being slightly lighter in tone. Yarrowa, grown outdoors, begins to flower fully two weeks earlier than the summer Spencers.

Hercules

A magnificent soft rose-pink of truly giant proportions, undoubtedly the best pure pink. A flower of great substance; the broad spreading and beautifully waved standard frequently measures two and one-half inches in diameter.

Illuminator

Pronounced the most glorious Sweet Pea ever seen. A rich cerise-salmon with an indication of bright orange which scintillates and glistens under-bright sun. Flowers four to a stem, beautifully waved and large.

Dainty Spencer

White, with exquisite rose-pink edges. Of uniformly large size and elegant shape.

Margaret Atlee

A new shade of pink unlike any other variety, being a glowing pink on a cream ground. The flower is of true Spencer size and form and the plants so vigorous that many "duplex" or double flowers are produced.

Fiery Cross

This is considered the finest scarlet in existence, of perfect Spencer type and a wonderfully brilliant color.

Captain of the Blues

A large clear purplish blue full Spencer size possessing bluish purple wings with veins of rosy purple.

Mrs. Cuthbertson

An improved Apple blossom, a bi-color, having rose pink standard with pure white wings, very large and fine. The best of the bright pink and white Spencers.
